

**CP1330 – BSCP15 v18.0 Redline Text v0.4**

**Section 1 – Section 2.2 No changes**

**Amendment of Section 3.1:**

*Insertion of text in 3.1.1 under the ‘Input Information required’ heading that BSCP14/4.1 forms should be sent to BSCCo and inclusion of references to CRA and removal step 3.1.13 that references the redundant BSCCo checklist*

**3.1 Registration of BM Unit Associated with Metering Systems Registered with the CRA<sup>1</sup>**

REF	WHEN	ACTION	FROM	TO	INPUT INFORMATION REQUIRED	MEDIUM
-----	------	--------	------	----	----------------------------	--------

---

<sup>1</sup> Not required for Change of CVA BM Unit Lead Party unless any changes are to be made to existing registration data.

REF	WHEN	ACTION	FROM	TO	INPUT INFORMATION REQUIRED	MEDIUM
3.1.1 <sup>2 3 4</sup>	At least 30WD prior to Effective From Date (in the case of standard BM Units)  Or At least 60WD prior to Effective From Date, or as advised by BSCCo (in the case of non-standard BM Units)	Submit Registration of BM Unit form <sup>5, 6, 7</sup>	Party	CRA	BSCP15/4.1, Registration of BM Unit signed by an authorised person, registered as such using BSCP38.  <u>BSCP15/4.1 forms and application information should be sent to BSCCo upon receipt, only in the case of non-standard BM Units.</u>	<b>Fax / Post / Email</b>
3.1.2	Within 1 WD of receipt of 3.1.1	Acknowledge receipt of Registration of BM Unit form	CRA	Party		<b>Fax / Email / Post</b>
3.1.3	At the same time as 3.1.2	The CRA checks the following: 1. The Party is registered with the CRA 2. The form has been completed by an authorised person. 3. The Effective From Date for the BM Unit is on or after the Effective From Date for the Party.	CRA		As submitted in 3.1.1	<b>Internal Process</b>

<sup>2</sup> Suppliers that have Customers directly connected to the Transmission System can register and de-register the BM Unit associated with that Customer premises within 5WD if the criteria in Section 1.7 have been satisfied.

<sup>3</sup> Where the BM Unit has the FPN flag set to Yes TC must be contacted at least 30 WD prior to EFD.

<sup>4</sup> Metering Systems are registered in accordance with BSCP20

<sup>5</sup> If a BM Unit registration is requested using Electronic File Data Transfer, the passwords and signatures are not required as the access control to the participant system is sufficient authentication.

<sup>6</sup> Where Exempt Export status is being requested for the BM Unit, procedure 3.9 should be followed concurrently.

<sup>7</sup> Where the Party is applying to register 2 or more Offshore Power Park Modules as a Combined Offshore BM Unit, BSCCo recommends that the Party consults with the TC before submitting this form.

<b>REF</b>	<b>WHEN</b>	<b>ACTION</b>	<b>FROM</b>	<b>TO</b>	<b>INPUT INFORMATION REQUIRED</b>	<b>MEDIUM</b>
3.1.4	Within 2 WD of 3.1.2	Where the BM Unit is an Exempt Export BM Unit, the Lead Party responsible for the BM Unit may elect its Trading Unit status by submitting form BSCP31/4.8 <sup>8</sup> .	Party	BSCCo	Election of TU Status (form BSCP31/4.8)	<b>Fax / Email</b>
3.1.5	At the same time as 3.1.2	Where the BM Unit is embedded within a GSP Group, confirm with the SMRA and Party whether the Metering System was previously registered in SMRA, and if “Yes” ensure that the Effective From Date is such that it prevents dual or no registration of supply in accordance with BSCP68.	CRA	Party SMRA	BM Unit Effective From Date (Where the BM Unit Effective From Date is such that it will have dual or no registration the Party should be informed to register the BM Unit with a new Effective From Date.)	<b>Fax / Email</b>
3.1.6	At the same time as 3.1.2	Inform CDCA, TC and BSCCo of the intended BM Unit registration.	CRA	CDCA TC BSCCo		<b>Fax / Email</b>
3.1.7	At the same time as 3.1.2	Where the BM Unit is embedded within a Distribution System inform the Contracted LDSO of the registration.  Where the Contracted LDSO is not the Nominated LDSO for the GSP group, CRA should also inform the Nominated LDSO of the registration. <sup>15</sup> Notification of such BM Units shall be sent to the SVAA in its capacity as the Market Domain Data manager

<sup>14</sup> The Supplier needs to ensure all Metering Systems associated with the additional Supplier BM Unit are re-allocated to either the Base BM Unit or another Supplier BM Unit associated with the same GSP Group (BSCP503 & 507) unless circuits are being disconnected.

## Amendment to Section 3.6: Update references to CRA and BSCCo and deletion of step 3.6.5

### 3.6 De-Registration of Supplier BM Units following Cessation of Supplier

Note: This process is specifically for the de-registration of Supplier BM Units when a Party ceases to be a Supplier and therefore covers both Base BM Units and any Additional BM Units registered in the name of the Supplier and subject to SVA processes. However, it does not cover de-registration of BM Units that are subject to Central Volume Allocation processes. BM Units subject to CVA processes should be de-registered in accordance with section 3.5.

This process does not apply to a transfer of Supplier ID, which should be done in accordance with section 3.14.

REF	WHEN	ACTION	FROM	TO	INPUT INFORMATION REQUIRED	MEDIUM
3.6.1	As required, <del>but before 3.6.4.</del>	Initiate Market Domain Data (MDD) process (BSCP509)	<del>Originator</del> Party	BSCCo	Form BSCP509/01 & relevant part of entity forms document.  <u>Effective To Date must be on or after the MDD Go Live Date.</u>	<b>Fax / Email</b>

### Section 3.7 – No changes

### *Amendment to Section 3.8: Update references to CRA and BSCCo and deletion of step 3.8.5*

### 3.8 Mid-Season Changes of Generation Capacity and Demand Capacities

This process supports the Code obligation on Parties to revise GC/DC capacity of a BM Unit by an amount specified in Section K3.4.

Parties have the right to downwardly revise the magnitude of DC twice during a BSC Season when the magnitude of the capacity of a Supplier BM Unit has decreased. Parties are not permitted to downwardly revise the magnitude of GC

Parties should note that where a revised GC/DC submission causes a Trading Unit to change its P/C Status, any MVRNA Authorisation will be terminated in accordance with Section P of the Code. Parties may therefore need to re-establish such MVRNA Authorisations in accordance with BSCP71.

Where a change in a BM Unit's Generation Capacity or Demand Capacity results in the FPN Flag being changed to "Yes" the Party is required to complete BSCP15/4.1.

REF	WHEN	ACTION	FROM	TO	INPUT INFORMATION REQUIRED	MEDIUM
3.8.1	10WD prior to Effective Date if P/C Status of Trading Unit changes  If P/C Status of the Trading Unit does not change, this timing may be reduced with the agreement of CRA and BSCCo.	Submit revised seasonal estimates of the maximum and positive magnitude and maximum negative magnitude BM Unit Metered Volume (QM <sub>ij</sub> ) for relevant BM Units. ### Section 3.9 – 3.12 – No changes

- *Amendment to Section 3.13: Update references of BSCCo to CRA and deletion of step 3.13.10*

### **3.13 Change of CVA BM Unit Lead Party**

**NOTE:** Suppliers taking part in this process must have satisfied the criteria detailed in 3.14 and registered with the ~~BSCCo~~CRA.

Prior to initiating this process the Party registering the BM Unit(s) as part of the Change of BM Unit Lead Party (CoBLP) is required to have acceded to the BSC and completed Party registration and qualification. If appropriate, the Party should also have completed all the TC requirements.

The timescales noted within this process are based on the existing MSID(s), BM Unit(s) and Trading Unit registrations being transferred from one Party to another with the associated Meter Technical Details (MTDs), Metering Dispensation(s) and Aggregation Rules. If Parties wish to change any of these registrations (for example to effect changes to configuration and entity Ids) then additional BSCPs may need to be followed and/or the lead-time for completing the process may be increased. Where this applies, Parties should contact BSCCo for advice on the process to be followed and documentation required.

If there are no changes to the registration data associated with the BM Units and the prerequisites stated have been met then Parties may use this process in order to transfer BM Unit(s) and associated MSID(s), MTDs, Metering Dispensations, Aggregation Rules and an associated Trading Unit through this procedure. Under these circumstances Parties will not be required to carry out additional steps in this BSCP, BSCP20, BSCP31, BSCP32 and BSCP75 in order to complete the transfer.

Where a BM Unit is an Exempt Export BM Unit please note that all registration details (including previously elected Trading Unit and P/C Flag options) will be unchanged unless a change is expressly requested. Where this applies, Parties should contact BSCCo for further information.
