

Change Proposal – F40/01	CP No: 996 Version No:								
Title <i>(mandatory by originator)</i> Amendment to BSCP06 'Notification and Sealing of Metering Equipment for Central Volume Allocation' to allow the Meter Operator Agent to remove and place CVA Metering Equipment seals.									
Description of Problem/Issue <i>(mandatory by originator)</i> The proposal will amended BSCP06 by removing the obligation on the CDCA to carry out the sealing of CVA Metering Equipment. The changes will allow the MOA to initially seal, remove and replace seals and also remove the need for the CDCA to attend site where the MOA is required to conduct work on CVA Metering Systems.									
Proposed Solution(s) <i>(mandatory by originator)</i> Changes to BSCP06 will allow the MOA to remove and replace CVA Metering Equipment seals as necessary and will ensure that the MOA carries out sealing as opposed to the CDCA. An obligation to retrieve meter data before and after any works are carried out will remain for work that will affect the meter's data, the provision of this data will be provided by the MOA or CDCA as determined by the MOA.									
Justification for Change <i>(mandatory by originator)</i> This change will ensure that the obligation for sealing CVA Metering Equipment falls with the Agent responsible for that Metering Equipment. It will also harmonise the CVA sealing arrangements with the SVA sealing arrangements where the SVA MOA has responsibility for sealing.
