Change Proposal – F40/01	CP No: 944 Version No: 3.0
Title <i>(mandatory by originator)</i> Interconnector Administrator Data Flows	
Description of Problem/Issue <i>(mandatory by originator)</i>	
<p>The Interconnector Administrator (IA) is required under the BSC to submit a file of Deemed Metered Volumes within 2 working days of the Settlement Day for the Interconnector concerned. This requires the IA to have the necessary Interconnector BM Unit Registration details.</p> <p>Currently, there is no provision within the IDD to provide the IA with this BM Unit Registration data and therefore the IA currently relies upon the party registering the BM Units to provide the necessary information. To enable the IA to fulfil its role, it is important that formal notification of Interconnector BM Unit registration is provided.</p> <p>This Change Proposal seeks to address the issue by requesting that ELEXON notify the relevant IA, via email, of changes to BM Unit registration details (i.e. details of newly registered Interconnector BM Units and details of de-registrations of existing Interconnector BM Units).</p>	
Proposed Solution(s) <i>(mandatory by originator)</i>	
<p>Email from ELEXON to the relevant IA providing the following data for newly registered Interconnector BM Units:</p> <p>BSC Party BSC Party ID</p> <p>Interconnector Production BM Unit ID Interconnector Consumption BM Unit ID</p> <p>Effective Date</p> <p>In addition, ELEXON shall provide the relevant IA, via email, notification of the de-registration of Interconnector BM Units and the effective date of any such de-registration.</p> <p>For the avoidance of doubt, the proposed solution <u>would not include</u> notification of changes in the DC or GC values of existing Interconnector BM Units.</p>	

Change Proposal – F40/01	CP No: 944 Version No: 3.0
Justification for Change (<i>mandatory by originator</i>)	
Currently there is no provision for the formal supply of Interconnector BM Unit registration data to the Interconnector Administrator. Provision of such information will allow the IA to update its systems and procedures and perform its duties in the timescales required by the BSC.	
Configurable Items Potentially Affected by Proposed Solution(s) (<i>optional by Originator</i>)	
Impact on Core Industry Documents (<i>optional by originator</i>)	
Related Changes and/or Projects (<i>mandatory by BSSCo</i>)	
Change required to BSCP15 to reflect this new requirement/process. Email address, for each IA, to which ELEXON can send registration/de-registration details required.	
Requested Implementation Date (<i>mandatory by originator</i>)	
The next suitable BSC Systems Release following the required review and impact assessment process. Reason: Timeliness and efficiency	
Agreed Release/Implementation Date (<i>mandatory by BSCCo</i>)
