Change Proposal – F40/01	CP No: 941
	Version No: 2

Title *(mandatory by originator)*

Add GSP Group information to the Data Collector / Meter Operator appointment data flow (D0155).

Description of Problem/Issue *(mandatory by originator)*

Modify the D0155 'Notification of Meter Operator or Data Collector Appointment and Terms' data flow to include the 'GSP Group ID' of the Metering System concerned.

Proposed Solution(s) *(mandatory by originator)*

Modify the D0155 data flow in the SVA Data Catalogue, to include the Metering System's 'GSP Group ID' as illustrated in Annex A for the proposed changes to the DTC.

Justification for Change *(mandatory by originator)*

After the introduction of Modification Proposal P62 ("Changes to Facilitate Competitive Supply on the Networks of New Licensed Distributors"), Supplier Agents will no longer be able to determine the GSP Group from the first two digits of the Metering System's MSID. This Change Proposal will enable Data Collectors and Meter Operators to know the GSP Group location of a Metering System as soon as they first receive the appointment request from the Supplier.

Configurable Items Potentially Affected by Proposed Solution(s) *(optional by Originator)*

None.

Impact on Core Industry Documents *(optional by originator)*

A DTC CP (number yet to be allocated) 'Add GSP Group information to the Data Collector / Meter Operator appointment data flow' has been raised and these CPs should be implemented in parallel.

Related Changes and/or Projects *(mandatory by BSSCo)*

Requested Implementation Date *(mandatory by originator)*

February 2004 or as otherwise agreed by the MRA Development Board for the corresponding DTC CP.

Reason:

Ensures a parallel implementation of changes to both the SVA Data Catalogue and the DTC.

Agreed Release/Implementation Date *(mandatory by BSCCo)*
