

Change Proposal – F40/01 (Page 1 of 2)	CP No: 870 <i>(mandatory by BSCCo)</i>
Title <i>(mandatory by originator)</i> Reporting of GC and DC values for each BM Unit in a CRA Report.	
Description of Change <i>(mandatory by originator)</i> Introduce new CRA Report to contain details of GC, DC and CALF for each BM Unit and Effective from dates.	
Proposed Solution(s) <i>(mandatory by originator)</i> A new CRA Report would provide data on GC, DC and CALF values and Effective From Dates each time the data changed (appeals, new Season data or increases within Season).	
Justification for Change <i>(mandatory by originator)</i> At present the ECVAA I-014 Report contains a value of CAQCE at the Party level for each half hour but contains no supporting information as to how this was derived. Experience of trying to resolve differences between our own calculation and those of the Central Systems has shown that it is a laborious process as the Central systems do not report on individual values of DC / GC (and hence allow the intermediate derivation of CAQCE for the BM Unit). The more BM Units that a Party is either the Lead or Subsidiary for, the greater the problem.
