| <p align="center"><b>Change Proposal – F40/02 (Page 1 of2)</b></p>   | <p><b>CP No: 662</b><br/> <i>(mandatory by BSCCo)</i></p> |
|  |   |
| <p><b>Title</b> <i>(mandatory by originator)</i></p> <p>Revise timescale associated with SVAA loading the approved LLFs (annual and ad-hoc).</p>   |   |
| <p><b>Description of Change</b> <i>(mandatory by originator)</i></p> <p>Step 3.2.9 of process 3.2 “Update, Annually or as Required, of SVA LLFs for an Existing LLFC Id” within BSCP528 “SVA Line Loss Factors” requires the SVAA to load the LLFs within 5 Working Days of receiving the schedule from the Public Distribution System Operator (PDSO).</p> <p>The timescale specified in BSCP528 is too tight for both the annual and the ad-hoc update of LLFs. This activity normally takes around 10 Working Days to complete.</p> |   |
| <p><b>Proposed Solution(s)</b> <i>(mandatory by originator)</i></p> <p>The proposal is therefore to amend the timescale as follows:</p> <p>“Within a timescale agreed between SVAA and BSCCo, taking into account the updates required to MDD.”</p>  |   |
| <p><b>Justification for Change</b> <i>(mandatory by originator)</i></p> <p>This CP has been initiated by the SVAA.</p> <p>Ensures that the BSCP reflects the additional timescale required for the LLF updates.</p> <p>This change only impacts the SVAA and the BSCCo and should be implemented prior to the next annual LLF update which will take place in February 2002.</p>   |   |
| <p><b>Other Configurable Items Potentially Affected by Proposed Solution(s)</b> <i>(optional by BSCCo)</i></p> <p>None.</p>  |   |
| <p><b>Impact on Core Industry Documents</b> <i>(optional by originator)</i></p> <p>None.</p>   |   |
| <p><b>Related Changes and/or Projects</b> <i>(mandatory by BSCCo)</i></p> <p>None.</p>   |   |
