

## Change Proposal – F40/01 (Page 1 of 2)

CP No: 755  
(mandatory by BSCCo)

### **Title** (mandatory by originator) **Enhanced ECVAAs Reporting**

#### **Description of Change** (mandatory by originator)

During the recent collapse of some Enron companies, ELEXON arranged for a number of temporary changes to the production of the Forward Contract Report (ECVAA-I022). These changes included:-

- increasing the frequency of production from two to five times per day;
- including data for the current day together with the next seven days; and
- provision of an extended Forward Contract Report providing long term information beyond the usual seven day horizon.

These temporary enhancements to ECVAAs reporting were provided to assist Parties in confirming their notified contract position with the ECVAAs during the exceptional circumstances arising from the Enron collapse.

In light of the increased information these reports provided, it would seem helpful, subject to costs, to consider making enhancements to reports generated by the ECVAAs. This would increase the routine reporting to Parties, and help in the management of any future market problems.

#### **Proposed Solution(s)** (mandatory by originator)

This Change Proposal recommends two specific enhancements to ECVAAs reporting that will provide Parties and Notification Agents with more information relating the processing of ECVNs and MVRNs by the ECVAAs.

The two enhancements are:-

1. Forward Contract Report (ECVAA-I022)

To include the current day within the scope of the report in addition to the next 7 days that are already reported.

2. New ECVNs and MVRNs Feedback Reports to Parties and Notification Agents

Provide additional feedback reporting in response to the submission of ECVNs or MVRNs to assist Parties in managing their within day trading positions. These reports should include the latest information and show which ECVNs/MVRNs have been accepted and which have been rejected.

#### **Justification for Change** (mandatory by originator)

These two enhancements will provide Parties and Notification Agents with more information on the processing of ECVNs and MVRNs.

#### **Other Configurable Items Potentially Affected by Proposed Solution(s)** (optional by BSCCo)
