

# BSC RELEASE CIRCULAR – JUNE 2019 RELEASE

---

<b>Date</b>	25 March 2019
<b>To</b>	SVA and CVA Release Circular distribution
<b>From</b>	ELEXON Design and Delivery
<b>Purpose</b>	Review of BSC Configurable Items amended for P367

---

## What is the purpose of this Circular?

We sent out a [Release circular](#) on 18 February 2019, notifying the initial scope of the June 2019 Release.

Approved Modification [P367](#) ("Removal of obsolete Supplemental Balancing Reserve (SBR) and Demand Side Balancing Reserve (DSBR) arrangements") will be implemented as part of this Release.

This circular invites the BSC Parties to review the proposed changes to the BSC Configurable Items (CIs). The changes are redlined for your review.

Please return any comments to ELEXON at [releases@elexon.co.uk](mailto:releases@elexon.co.uk), using the review form provided as Attachment 1 to this circular, by **17.00 on Friday, 29 March 2019**.

## What's new for P367?

P367 will remove the now obsolete Supplemental Balancing Reserve (SBR) and Demand Side Balancing Reserve (DSBR) arrangements.

The scope of this circular is limited to review of the BSC CIs amended for P367. The amended BSC Sections were approved during the Modification process. The other documents such as the Imbalance Pricing Guidance Note and Section T Simple Guide will be updated and reviewed internally within ELEXON and published on the implementation date.

## Who is impacted by P367?

There are no impacts on the BSC Parties and Party Agents. There are no changes to the BSC Systems.

## Is there anything else to note?

These CIs have P369 changes applied to them. These changes were sent out for your review late last year and approved by the Panel on 13 December 2019.

[P369](#) ("National Grid Legal Separation changes to BSC") will be implemented as part of the [March 2019 Standalone Release](#) on 29 March 2019.

11	<a href="#">SAA User Requirement Specification</a>	ISG	2
12	<a href="#">EAC/AA User Requirement Specification</a>	SVG	2

## What will happen after the industry review?

ELEXON will consider all review comments and update the documents as required. ELEXON will also inform the outcome of any comments to the relevant reviewer where necessary.

We will then take the documents and a summary of any consultation responses to the responsible committees for approval. The committee papers will note any comments that we didn't action and any subsequent course of action undertaken as a result.

## When will the BSC Configurable Items become effective?

The CIs will become effective on 27 June 2019 if approved by the responsible committees.
