

BSC RELEASE CIRCULAR - TERRE STANDALONE RELEASE

Date	11 July 2019
To	CVA and SVA Release Circular distribution
From	ELEXON Project Delivery
Purpose	This circular notifies interested parties of the latest draft versions of the BSC Configurable Items amended for Project TERRE, which includes the IDD Spreadsheets.

What is the purpose of this Circular?

The purpose of this circular is to notify interested parties of the latest versions of the BSC Configurable Items (CIs) that we are amending under CP1517 to give full effect to the P344 Final Implementation.

Background

On 17 May 2019, ELEXON BSC Change issued Change Proposal [CP1517](#) for industry consultation as part of [Change Proposal Circular CPC00794](#). The BSC Release team followed up with an email advising interested parties that draft E of the NETA IDD Part 1 and 2 have been uploaded onto the webpage.

Following the conclusion of the industry consultation, ELEXON has made further amendments to some of the BSC CIs to address comments received from the consultation and to provide additional information for the benefit of the industry.

Consequently, ELEXON issued CP1517 for a second industry consultation on 9 July 2019 through [CPC CPC00795](#).

Where can I find details of the amendments to the BSC CIs?

Please refer to Section 2 of the CP1517 second Consultation Document, which is included in the [CPC CPC00795](#) pack, for details of the amendments to the BSC CIs

As we have published interim versions of the Interface Definition and Design (IDD) Spreadsheets for information on the [Project TERRE and Wider Access page of the ELEXON website](#) since December 2018, we have also published the latest versions of the IDD Spreadsheets on this page as "Draft F" versions.

When will we request approval of the BSC CIs amended for CP1517?

The second consultation for CP1517 will end on 2 August 2019. We will request approval of the relevant BSC CIs from the Imbalance Settlement Group on 20 August and/or the Supplier Volume Allocation Group on 3 September 2019, as required by the BSC Baseline Statement.

What else do I need to know?

BMRS API User Guide: The TERRE changes impact the BMRS APIs and DataPush. These changes have been documented within the [BMRS API User guide](#).

For more information on TERRE and Wider Access Implementation, please visit the ['P344 Implementation: Project TERRE and Wider Access'](#) page of the ELEXON website.

If you have any queries or comments on Market Entry process, please send them to Market.entry@elexon.co.uk

If you have any queries or comments on Industry testing, please send them to terre.testing@elexon.co.uk

If you have any queries or comments, please send them to releases@elexon.co.uk.
