

# ISD Publication notice

Date  
**11 September 2025**

Paper number  
**0.1**

Document owner  
**Participant Management**

Classification  
**Public**

## Synopsis

This is an Elexon notice that the Version .12 of the ISD Catalogue has been published on the Elexon Portal ISD Datastore on the 11 September 2025. The link to the ISD Datastore and key information is provided below.

### 1. Publication Notice

11 September 2025 Elexon has published Version .12 of the ISD catalogue to the [ISD Datastore](#). MHHS Participants and BSC Party's can use the link and download the ISD Catalogue. An IF\_47 message was also triggered on the DIP containing the link, but this should not be received by qualified participants until retriggered on the 22 September 2025.

### 2. What is ISD?

Industry Standing Data (ISD) is a centralised, common set of reference information used by all electricity market participants, a directory that ensures all energy suppliers, network operators, and third-party service providers are using the same foundational data to interpret information related to each metering system.

### 3. Access to the ISD Catalogue

All versions of the ISD Catalogue will be published to the [ISD Portal](#). The portal allows filtering of the ISD catalogue for downloading. The file will also be available on the [MHHS Collaboration Base](#) to download.

No log in credentials, special certificates or access permissions are required to access the [ISD Portal](#) or the [ISD Datastore](#). If you have any issues accessing the Portal or Datastore please raise a request via [Elexon Support](#). Your company does not need to be onboarded for you to raise a support request. Anyone can register and raise a support request.

### 4. ISD publication timetable

The timetable for future ISD catalogue publications can be found in the [MDD/ISD Calendar](#)

## 5. Requesting a change

To submit a Change Request, you will need to access the Kinnect Customer Portal as an authorised signatory. All Participant's who are already CAT A Kinnect Customer Solution Users will be automatically granted access to ISD from 22 September. You will be able to raise ISD CRs from this point.

If you are not a CAT A and require access to ISD to raise your own ISD CR's, an existing Cat A will be required to add you via the Elexon Kinnect platform or by submitting BSCP38 to the Elexon Market Entry Team.

Please note Cat Y users will also be able to raise ISD CRs on Kinnect, and Cat X users will be able to submit CVA and SVA Line Loss Factors on Kinnect. They do not need to be granted the same authorisation level as a CAT A.

If you are not eligible for Kinnect Customer Portal access, requests must be completed using the relevant BSCP707 Entity Forms, accompanied by a BSCP707/01 Cover Form. Please submit your forms via [Elexon Support](#).

- [BSCP707 relating to changes to Industry Standing Data \(MHHS website\)](#)
- [BSCP707 Appendix 1: ISD Entity Change Request Form \(MHHS website\)](#)
- [BSCP707 Appendix 2: ISD Change Request Entity Validation \(MHHS website\)](#)

## 6. Further information and FAQs

Further information on ISD, Guidance note and FAQs can be found on the [Elexon website ISD page](#).
